PERSONAL PROJECTS

Kampus Rides (10/2024 - Present)

- A ride-sharing application designed to facilitate student transportation on campus

Evalify (09/2024 - Present)

- **Evalify** is a **web-based project evaluation system** that streamlines academic assessments. Students can submit projects online, while evaluators review, grade, and give feedback digitally. It ensures fairness, transparency, and efficiency by replacing manual grading with a modern, centralized platform.

OptiCare (04/2024 - Present)

- An application that enables optometrists to efficiently manage patients, schedule appointments, track treatment plans and vitals, and handle inventory and invoices, all in one platform

CERTIFICATES

Critical Infrastructure Protection (OPSWAT) (05/2024)

Junior Cybersecurity Analyst (CISCO) (06/2024)

Linux Administration Fundamentals (01/2025)

Python Essentials (12/2024)
